PROFILE

I'm a Web developer with a focus on JavaScript. I would only be interested in remote work. If possible would like to work with ReactJS, React Native, NextJS, TypeScript, and GraphQL or remote database service like Firebase.

I love writing clean code and would like to improve my skills in writing automated tests (jest, jasmine, Cypress).

Besides programming I also have a knowledge about SEO, security, and tech writing.

OPEN SOURCE PROJECTS:

JQUERY TERMINAL

JavaScript library, which can be called a framework for creating command-line applications in a browser. It has a lot of features like syntax highlighting, but also a simple API for basic functionality.

GIT WEB TERMINAL

A command-line application that uses isomorphic-git and gives access to git from a browser. It has interesting usage of Service Worker.

LEASH SHELL

A web application that gives access to a shell on shared hosting that doesn't give access to SSH. It has features like vi and Emacs editors and access to MySQL database.

ISOMORPHIC-GIT

Git implementation in JavaScript for browsers and NodeJS. I'm an active maintainer of the project. The main author doesn't work on the project anymore. I'm mostly communicating with users, doing code reviews, merging changes, and make decisions about the project.

SYSEND

Vanilla JavaScript Library for sending communication between open browser tabs. It has a very simple API and has no dependencies. It uses native browser APIs.

GGTIPS

R package for creating tooltips on Plots with popular ggplot library. I'm the author of the front-end part. It was a project for ASTEK client (pharmaceutical company)

GAIMAN

Programming language based on Ruby which compiles to JavaScript. The main purpose is to make easier to create command line application like games.

LIPS

Scheme interpreter (a dialect of lisp) written in JavaScript. At the beginning, it was only based on Scheme, but later I've decided that I want to make it a fully R7RS Spec compliant Scheme, plus some additional features.

TAGGER

Simple tag editor in Vanilla JavaScript without any external dependencies.

WAYNE

Library in Vanilla JavaScript that allows to creation of fake HTTP replies using Service Worker, using simple API based on express.js.

COURSES AND TRAININGS:

Kurs Reacta - DevMastry

VOLUNTEER WORK

WIKIPEDIA

I'm newcomers mentor and Wiki Trainer on Polish Wikipedia. I'm help beginners by answering questions, and monitoring assigned users if they don't need any help even if they don't ask for this specifically. Conducting Online and on-site Training about Copyright, Creative Commons, and Wikimedia Commons.

FREECODECAMP

Writing technical articles and sharing knowledge.

OPENCLIPART

I was member of openclipart.org website since 2006, creating public domain vector artwork. Later joined as a volunteer, working on the website, which used AikiFramework. In-database widget based Content Management Framework.
